

STAY SAFE ONLINE!

From gaming and chat, to streaming videos, the internet can be used for many good things, but bad as well. Think of the internet as a monster. When you post something, it eats it, and you can't do anything anymore, no matter what you try, it's there forever.

Safer internet day is celebrated globally in february each year to promote the safe and positive use of the internet for children and young people, and to inspire a national conversation about using technology responsibly, respectfully and creatively. Safer internet day 2022 will be celebrated with the theme 'all fun and games? Exploring respect and relationships online' on 8th February. Now, although this date might have passed when you are reading this, that doesn't mean you shouldn't be safe online. Being safe online is all about teaching people how to be safe online every day.
